

Heat Pumps

The New Boiler Upgrade Scheme allows UK homeowners to apply for a one-off and upfront £5,000 voucher for replacing less efficient gas boilers with Air Source Heat Pumps.

The grant isn't designed to cover the full costs of a heat pump installation. In fact, the average household can expect to pay between £10,000 and £12,000. However, this grant will allow upfront costs to be reduced to the same level as replacing a gas boiler. Applications for grants open on 23rd May 2022
